***Reason for Allowance***

The following is an examiner's statement of reasons for allowance: the applicant's amendment filed on 12-05-05 overcomes the technical deficiencies and the prior art of record.

The prior art reference of records (US 6,552,593, 6,762,625, 6,711,396) fail to teach or fairly suggest a first stage of a preamplifier circuit comprising: first and second differential pairs; coupling capacitors coupled to the bases of the amplifying transistors; first and second current loops comprising resistors; first to fourth transistor switches as called for in claims 1 and 9; a method of reducing the offset current from a base current compensation circuit, comprising: placing a current loop comprised of a balanced pair of resistors opposite each other and a pair of transistor switches opposite each other across the bases of a differential pair of transistors; and capacitively coupling the current loop to the input of a circuit so that the current loop charges input capacitors so as to decrease the recovery time of the circuit as called for in claim 18, Therefore, claims 1-3 and 5-20 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
